GlobiNet designs, develops and delivers best value solutions to meet the requirement of telecom operators, by providing :

- Supply and installation for most of the passive materials.
- Installation of most of core network equipment and for wide range for vendors.
- Do all the necessary cable structure according to the operator standard.
- Installation all GSM and Micro Wave equipment.
- Do RF Survey and prepare the RF Survey reports.
- Installation of TRANSAS Antennas (RDF, AIS, GPS, DGPS, VHF) Base Station and ACWL System.
- Determination of Antenna Height & Orientation for optimum performance
- Conduct and Manage Line-Of-Sight (LOS) Survey for Microwave Links Installation, alignment and commissioning of Microwave Antennas.
- Doing any minor Civil work might be required for Radio sites.

E&M of Data center

Data centers are vital component for most of the business in the modern world, delivering digital services and online customer experiences. In GlobiNet we are capable to implement below component of data center.

- Raised Flooring
- In-Room Electrical
- Standby Power
- Cooling
- Fire Suppression
- Cable Structure

IT Network Infrastructure Planning and Design Services

Network infrastructure requirements often change as businesses grow and the economic climate changes, companies do not always have the sufficient time or resources to assess their infrastructure blueprint.

Through our IT Network service we will work with you to understand your business and help you get:

- Better resilience, availability and stability out of your current IT infrastructure.
- Design and implement a fully scalable and dependable IT network infrastructure to support your most demanding business communication needs, or help you replicate your current IT network to new premises as your business grows.

We will work with you to:

- Assess current IT network.
- Network infrastructure planning and design - a fully integrated and scalable infrastructure, focusing on network reliability.
- Implementation and deploy the IT infrastructure.
- Train your staff on documenting procedures and configuration information.
- Continuously monitor and support your IT network.

UTP and Fiber Cable Structure

GlobiNet understand the importance to businesses of having a fast, flexible and reliable structured cabling system (SCS). In today's IT technology world there is a huge reliance on the performance of the Structured Cabling System to deliver the fastest media across your network, from the traditional data throughput to modern VOIP and multi-media applications.

Choosing the right Structured Cabling System and installer is as essential to modern businesses as any other utility. At GlobiNet the selection and installation of a high-performance Structured Cabling System is the core of our business. We have installed some of the largest and most service critical Structured Cabling Systems across Saudi Arabia.

Outsourcing

We also provide our services by resourcing appropriate Manpower for the Infrastructure Utility development, Maintenance of Facilities and other ICT related project .

Our Outsource services:

- Project Management.
- Supply and Installation of Data center components.
- Information Security solutions.
- Network Cabling, Ducting for FTTH.

مصدر قوتنا

1- التركيز على خدمة و رضى عملائنا هو اساس اهتمامنا . و العمل على جعل عملائنا ناجحين هو اولويتنا الاولى. برضاك نقيس نجاحنا، و لكي تكون راضيًا تمامًا ، يجب أولاً أن نفهم متطلبات وأهداف عملك، لهذا السبب نبدأ بالاستماع بعناية ، ونستمع في الاستماع طوال علاقتنا، ومجرد أن نفهم كيف تريد إدارة عملك اليوم ، فإننا ننصحك باستراتيجيات استخدام التكنولوجيا، فانت تحتاج حلول اليوم من اجل معالجة تحديات الغد والتكيف معها.

2- الابتكار هو قوتنا ، نحن ملتزمون بالابتكار ، ليس فقط في خدماتنا المتطورة ، ولكن أيضًا الطريقة التي نؤدي بها أعمالنا. للتكنولوجيا الجديدة تأثير هائل على كل جانب من جوانب الحياة اليومية الحديثة، وهي ليست مجرد ظاهره تحدث مره واحدة ، ولكنها سلسلة مستمرة من الابتكارات الرائعة.لذلك وضعنا التطور التكنولوجي في طبيعة روحنا لمعرفة كيف ومتى وأين نستخدم هذه الأبعاد الجديدة من خلال المرونة و التكيف مع التغييرات واستغلالها إلى أقصى إمكاناتها.

3- تقدير الموظف هو مفتاح نجاحنا، لدينا مجموعة من الأشخاص المتفانين الذين يعملون بجد والذين هم خبراء في مجالاتنا وقد تعاونوا معًا لإنجاز الأمور الاستثنائية لعملائنا. القيادة والنزاهة والشغف بالتعلم والاحترام المتبادل والدافع و المبادرات هي السمات المميزة لثقافتنا.

Our Strength

1. Client focus is the cornerstone of our business, we aspire to make our clients successful. We are honored and privileged to serve our clients; client satisfaction is our first priority, as, through such satisfaction, we can measure our success. First of all, we are required to understand the requirements and goals of your business, so we start our work by listening carefully to the client; also, we keep observing the client's considerations throughout our relationship. Once we understand how do you want to manage your work currently, we recommend the proper strategies based on technology, as you do not only need today's solutions but also you need to address and adapt to tomorrow's challenges.

2. Innovation is our strength, we are committed to innovation, not only in our advanced services but also in how we manage our business. Due to the fact that new technologies have a significant impact on our daily and modern life, which could not be considered as a one-time phenomenon, but continuous series of marvelous innovations, we consider technological development as our ultimate goal and moving spirit, through which we could know how, when and where to use these new dimensions through flexibility and adaptation to new changes, and exploit them to the fullest extent.

3. Appreciating employees is our key to success: we are a highly dedicated and hardworking group of persons, who are experts in the related field and cooperate with each other to accomplish extraordinary tasks for our clients. Noting that leadership, honesty, passion for learning, mutual respect, motivation, and initiative are the distinctive feature of our culture.
